This project builds on the existing Cube infrastructure to provide the interaction framework and the corresponding testbed to support research into human behavior and practices using a mixed-reality environments. The case study (FutureHaus) explores how to provide architectural modeling and design tools in the Cube to improve the overall design process and to foster the creative process in an architecture setting.

Participants: Faculty: Denis Gracanin (College of Engineering); Joseph Wheeler (College of Architecture & Urban Studies); Joe Gabbard (College of Engineering), John Richey (College of Science); Students: Chris Bales, Matt Davis, Barsam Dokh, Mohamed Handosa, Alex Heivilin, John Kerr, Brandon Lingenfelser, Willy Lund, Logan Mayes, Sean Meacham, Greg Robertson, Sonika Singh, Karen Tran, and Andrew Valdespinovvm (College of Engineering)

Type: Virtual Reality, Human Behavior

Date: July 2014 to June 2015
